DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22 and 36-37, drawn to communicating between software components, classified in class 717, subclass 107, "DATA PROCESSING: SOFTWARE DEVELOPMENT, INSTALLATION, AND MANAGEMENT: Code Generation: Component Based".
- II. Claims 23-24, drawn to adapters for translating/mapping data or variables between formats, classified in class 709, subclass 246, "ELECTRICAL COMPUTERS AND DIGITAL PROCESSING SYSTEMS: MULTICOMPUTER DATA TRANSFERRING: Computer-to-computer Data Modifying"
- III. Claims 25-35, drawn to method of evaluating a characteristic of a modeled system, classified in class 703, subclass 22, "DATA PROCESSING: STRUCTURAL DESIGN, MODELING, SIMULATION, AND EMULATION: SIMULATING ELECTRONIC DEVICE OR ELECTRICAL SYSTEM: Software program (i.e., performance prediction)"
- IV. Claims 38-46, drawn to modeling a biological system, classified in class 703, subclass 11, "DATA PROCESSING: STRUCTURAL DESIGN, MODELING, SIMULATION, AND EMULATION: SIMULATING NONELECTRICAL DEVICE OR SYSTEM: Biological or biochemical"

Art Unit: 2123

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case each group comprises a separate and distinct invention which is separately usable by itself. Each group has either a different mode of operation or function and thus are not necessarily capable of use together. For example, communicating between software components is a separate and distinct invention from modifying data attributes, estimating time necessary to evaluate a characteristic, and modeling a biological system, each of which are themselves separate and distinct from one another.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for each Group is not required for the remaining Groups, the restriction for examination purposes as indicated is proper.

Art Unit: 2123

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
